Dear Sir:

After a recent break and enter I required a way to counteract how fast the thieves were able to breach my door, despite bars and an alarm system. I investigated various ways of achieving a more secure entrance such as using unbreakable material instead of glass. I thought of having a double key lock but found that it was in violation of fire regulations.

When Bob saw the problem, he efficiently designed, fabricated, fit and installed a perfect solution that is functional and easy to use. I was amazed at how quickly he was able to have it on in such a short time.

I would highly recommend this product.
